Fieldframe Advisory – Capability Statement

Programme & Operations Advisory · Nicosia, Cyprus · fieldframe.eu

About Fieldframe

Fieldframe Advisory is a programme and operations consultancy based in Nicosia, Cyprus, working across Europe. We help organisations in any sector set up and run field operations, SOPs and operational procedures, and we design, manage and report on EU-funded programmes. Our roots are in migration and humanitarian response.

We combine two things that rarely sit together: field operations experience in some of the most demanding settings, including reception and humanitarian operations, and the programme discipline to win, manage and close EU-funded projects. Every engagement is scoped in writing, led by a senior consultant, and handed over with the files and tools the client's team needs.

Core services

Three service lines, each delivered as a short assignment, a fixed-price project or ongoing support.

Service	Who it is for	Key deliverables
EU funding & programme management	NGOs, municipalities, SMEs and research partners in Horizon Europe, Erasmus+, Interreg and AMIF projects	Call screening; full proposals (work packages, LogFrame, budget, Gantt); consortium coordination; M&E plans and indicators; periodic technical and financial reports; audit-ready files
Field operations & SOPs	Organisations that run work on the ground in any sector: public authorities, NGOs, infrastructure, facilities, hospitality and logistics operators	SOPs and operational procedures; set-up and running of field sites; logistics, distribution and supply-chain processes; quality assurance and compliance checks; staff training. Specialist depth in reception and humanitarian operations (CEAS, EU Pact, CCCM, WASH)

Service	Who it is for	Key deliverables
Operational tools & reporting	Teams and managers in any sector compiling numbers by hand	Tracking systems for stock, assets, people or cases; automated reporting templates; management and funder dashboards; process mapping; training and handover

Track record

Our team brings 10+ years of field and programme experience with EU agencies, UN agencies and international NGOs in Greece, Germany and Cyprus.

Organisation	Period	Selected experience
EUAA – European Union Agency for Asylum, Cyprus	2026 – present	Operations at Pournara First Reception Centre; co-lead of the reception team handling hundreds of arrivals per month; NFI distribution tracking and operational reporting
IOM – UN Migration, Greece & Germany	2020 – 2024	Resettlement operations for 10,000+ Afghan nationals; site management for a relocation programme for unaccompanied children; Safe Area Focal Point in Chios; NFI distributions in Kaiserslautern
INTERSOS Hellas, Greece	2019 – 2020	Managed the IOM HELIOS integration project across Thessaly: work plan, budget, EC/IOM donor compliance and reporting
Danish Refugee Council / Hellenic Ministry of Migration Policy	2016 – 2019	Humanitarian distributions and logistics SOPs; WASH upgrade proposals for Reception and Identification Centres across Greece
Caterpillar European R&D Centre, UK	2015 – 2016	R&D funding proposals and business cases

EU-funded programme work also covers Horizon Europe, Erasmus+ and Interreg projects in multi-partner consortia. Earlier engineering work includes supervising municipal infrastructure in Greece (wastewater facility, public lighting) and procurement under EU public tender rules.

Why Fieldframe

- **Field-tested.** Procedures and plans come from people who have run reception sites, distributions and infrastructure works, not only written about them.
- **Programme discipline.** LogFrames, budgets and reports built to EU grant rules and ready for audit.
- **Engineering mindset.** A mechanical engineering background brings structured, measurable systems and technical assessments of sites and infrastructure.
- **Tools, not just reports.** We leave behind working trackers and dashboards your team can keep using.
- **Senior-led and flexible.** One senior lead per assignment, remote or on site, across the EU.
